DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1). Species A: three-dimensional image display having alternatively arranged left-eye and right eye pixels, image separator, image deflector and image *shifter*, (Figures 1A to 1E),

(2). Species B: three-dimensional image display having alternatively arranged left-eye and right eye pixels, image separator, image deflector and image shifter with image *deflector* shown in Figures 2A to 3C,

(3). Species C: three-dimensional image display having alternatively arranged left-eye and right eye pixels, image separator, image deflector and image shifter with image *deflector* shown in Figures 4A to 5C,

(4). Species D: three-dimensional image display having alternatively arranged left-eye and right eye pixels, image separator, image deflector and image shifter with image *deflector* shown in Figures 6A to 7C,

(5). Species E: three-dimensional image display having alternatively arranged left-eye and right eye pixels, image separator, image deflector and image shifter with image *deflector* shown in Figures 8A to 8C,

(6). Species F: three-dimensional image display having alternatively arranged left-eye and right eye pixels, image separator, image deflector and image shifter with image *separator* shown in Figures 12A to 12B,

Art Unit: 2872

(7). Species G: three-dimensional image display having alternatively arranged left-eye and right-eye pixels, image separator, image deflector and image shifter with image *separator* shown in Figures 13A to 13B,

(8). Species H: three-dimensional image display having *time-divisionally input images*, an image separator and an image deflector, (Figure 14A to 14B),

(9). Species I: three-dimensional image display having *multiple viewpoints* and an image separator, as shown in Figure 16,

(10). Species J: three-dimensional image display having *multiple viewpoints*, an image separator, and an image *deflector* as shown in Figure 18,

(11). Species K: three-dimensional image display having multiple viewpoints, an image separator and image *deflector* as shown in Figure 21,

(12). Species L: three-dimensional image display having multiple viewpoints with specific image display *scanning* and *rewritten* method as shown in Figure 23,

(13). Species M: *three-dimensional projection image display* as shown in Figures 24-25,

(14). Species N: three-dimensional image display having multiple viewpoints, an image separator, and an image *deflector* as shown in Figures 26A to 26B,

(15) Species O: three-dimensional image display having multiple viewpoints, an image separator, and an image *deflector* as shown in Figure 29.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 2 are generic to species A to G.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any

Art Unit: 2872

claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was not made to applicant's attorney to request an oral election to the above restriction requirement, due to the complication of the requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
